

# Whats on in term 4?

## Neurodiverse Hangout Therapy Group

For 14 - 16 year olds

### IVANHOE CLINIC

The idea of a neurodiverse hangout group evolved from reflecting on the beautiful knowledge that teens possess about their unique neurodiversity, and how powerful this could be if shared with other neurodivergent peers.

This hangout is a safe space, where teens can form connections, and feel supported to share parts of their experiences, and what has helped (and not helped!) along the way.
